PRESS RELEASE
March 18, 2020

LEGENDS OF LEARNING OFFERS PARENTS FREE ACCESS TO LEARNING WHILE MANY STUDENTS ARE HOME DUE TO CORONAVIRUS

Washington, DC – March 19, 2020 – Legends of Learning, a game-based educational platform with thousands of curriculum-aligned math and science games for elementary and middle school students, is offering parents free access to their learning platform. Millions of elementary and middle school students already play Legends of Learning games in schools across the country, but now they can access thousands of curriculum-aligned math and science games from their home computers or devices.

The spread of coronavirus over the past week has led to an unprecedented number of school closures nationwide. These closures affect millions of students, teachers and families who will be forced to continue education remotely. Legends of Learning encourages students to master math and science subjects through the creative, engaging world of video games. A study completed with Vanderbilt University demonstrated that Legends of Learning games led to improved test scores, heightened engagement and improved attention spans among students.

Legends of Learning is uniquely built to be used independently by children, allowing parents to remove themselves from trying to play the role of your child's substitute teacher. Parents can follow their child's learning progression to make sure they are understanding core concepts and progressing through teacher-approved curriculum each day.

Currently, Legends of Learning serves more than one million students a month, in over 25,000 schools in every state across America.

ABOUT LEGENDS OF LEARNING

Legends of Learning is a game-based educational platform with thousands of curriculum-aligned math and science games for elementary and middle school students (grades 3-8). Millions of students play Legends of Learning games in school in *Teacher Mode*, but they can also play at home on their own through the school's normal curriculum in *Home Mode*. Backed by published research out of Vanderbilt University, Legends of Learning is one of the only tools that allows you to actively see your child's learning progression.
